3

ABSTRACT OF THE DISCLOSURE

4

5 A hammock system for allowing an individual to efficiently enter and exit the
6 hammock in a safe manner. The hammock system includes a support frame, and a
7 cradle frame having opposing ends pivotally attached to the support frame. The cradle
8 frame has a middle section surrounded by two opposing side sections, wherein the side
9 sections are at an angle with respect to the middle section forming a concave structure.
10 A mattress is preferably positioned upon the cradle frame. A catch member may be
11 attached to the support frame and removably connected to the cradle frame to retain
12 the cradle frame in a sofa position.
